## EDUCATION

### University of California, San Diego

La Jolla, CA

*B.S. Data Science*

2025

- Graduate (cross enrollment): Computer Vision, Recommender Systems, Deep Learning, Machine Learning
- Undergraduate: Principles & Techniques of Data Science, Statistics, Databases, Operating Systems, Cloud Computing, Scalable & Distributed Systems, Data Visualization, Geospatial Data Science, Computational Neuroscience

### University of California, Berkeley

Berkeley, CA

*Computer Science, Cross Enrollment*

2023

- Artificial Intelligence, Probabilistic Modeling & MDPs, Reinforcement Learning, Machine Learning, Algorithms

## SKILLS

*Python, Pandas, NumPy, PyTorch, Sci-Kit Learn, HuggingFace, OpenCV, Tensorflow, Dash/Plotly, Cuda, Dask/Ray, Streamlit  
AWS, Azure, Google Cloud, Docker, Kubernetes, Snowflake, Databricks, Spark, Hadoop, PostgreSQL, Github, Jira, ArcGIS, OOP*

## EXPERIENCE

### Bio-Rad

June 2024 - Present

*Data Science & Bioinformatics Intern - Clinical Diagnostics Group*

*Pleasanton*

- Built ETL pipeline w/ Pandas, RestAPI to ensure 100% data integrity & improved consistency from 91% to 99.9%
- Implemented unit tests & utilized Dask/NumPy to achieve 5.1x / 80.1% speedup on data validation across datasets
- Leveraged AWS ECR, Docker, PostgreSQL to deploy database, reduced storage usage by 35% through schema optimization
- Saved 61% in computing budget per month by utilizing spot instances and designing heuristics for Database I/O

### San Diego Supercomputer Center

June 2023 - September 2023

*Machine Learning Engineer Intern*

*Remote*

- Designed Content-Based Filtering Recommender System utilizing Cosine and Jaccard similarity for baseline output
- Trained an RL agent using Stable Baselines and Q-Learning to improve recommendation quality after 100 iterations
- Utilized AWS S3, PostgreSQL for database queries & vectorized code to achieve 1.7x runtime speedup in feature engineering
- Deployed Recommender System on AWS EC2, Lambda, achieving a design that scaled to process 200,000+ points

### Deloitte

February 2023 - June 2023

*Data Science Apprentice*

*Remote*

- Cleaned data w/ 3000+ features, 1 billion observations using Dask, vectorized Pandas to decrease cleaning runtime by 20%
- Leveraged XGBoost, Lasso to identify 850 significant features, predict drug use in young adults with 81% accuracy
- Tuned Hyperparameters, class weighting to improve F1 score from .35 to .70 and identify 10 highest risk demographics

### Chan Zuckerberg Biohub

June 2022 - January 2023

*Data Science Intern - Infectious Disease Group*

*San Francisco*

- Built 9 interactive visualizations of CRISPR screen comparisons between 20000 features using Pandas/Dash/Plotly
- Improved data processing of a Nextflow data pipeline (16,000,000 data points) to minimize runtime by 10%
- Designed algorithms to compare across 30+ virus screens to yield insights in virus-host interactions using vectorized code
- Wrote documentation for 23 functions from scratch and improved 3K+ codebase readability using Readthedocs

### University of California, San Diego

April 2024 - Present

*Machine Learning Researcher*

*La Jolla*

- Investigating robustness of LLM's for Spatial Data Science - Spatial Information Systems Lab
- Researching & designing models to predict public transportation accessibility in New York City (RMSE of .1785)
- Utilizing machine learning to identify and predict crime hotspots in cities supervised by Prof. Wartell and Prof. Zaslavsky

## PROJECTS & LEADERSHIP

### University of California, San Diego

September 2023 - March 2024

*Instructional Assistant*

*La Jolla*

- Beta Testing assignment and exam questions, hosting Office Hours for a data science course of over 500 students
- Updated deployment of course website using github pages & Docker supervised by under Suraj and Tiefenbruck
- Grading and hosting Office Hours for upper division data science course of over 700 students under Shannon Ellis

Exploring CNN Architecture for Semantic Segmentation — PyTorch, OpenCV, HuggingFace

February 2024

- Implemented different UNet architectures with AdamW Optimization, Data Augmentation, weighted cross entropy loss, learning rate scheduling to improve IoU score from .055 to .071 and pixel accuracy from 73.4% to 75.1%
- Utilized FCN ResNet-101 for transfer learning further improving IoU score to .33 and validation accuracy to 87.3%

### Data Science Society

October 2023 - Present

*Projects Director*

- Sourcing and mentoring 12 data science projects during the academic year
